

ICON expands US early phase research capabilities with new clinic and outpatient centres

May 13, 2026

- New, 69.5K square-foot, state-of-the-art clinic in Texas integrates clinical, laboratory, and pharmacy infrastructure all under one roof
- Two new satellite outpatient clinics in Texas and Kansas will further expand recruitment reach and reduce visit burden

DUBLIN & SAN ANTONIO--(BUSINESS WIRE)--May 13, 2026-- [ICON plc](#) (NASDAQ: ICLR), a world-leading clinical research organisation, today announced the expansion of its early phase capabilities with the opening of a new, state-of-the-art Clinical Research Unit (CRU) in San Antonio, Texas, as well as new satellite outpatient clinics in Houston, Texas and Lawrence, Kansas. These new, purpose-built clinics will significantly expand ICON's capacity to conduct first-in-human, healthy participant, and patient cohort studies.

Welcoming visitors to ICON's new San Antonio Phase 1 clinic, purpose -built to support early clinical development

accelerated delivery of data to sponsors. Onsite capabilities include a Good Manufacturing Practice / Good Clinical Practice (GMP/GCP) compliant pharmacy and manufacturing space with International Organisation for Standardisation (ISO) cleanrooms, a clinical safety laboratory, and sample processing and shipping facilities.

This new facility has also been designed with participant comfort, safety, and experience as a priority. It features private and semi-private dormitories, recreation areas, dedicated clinical spaces, and advanced safety systems for continuous monitoring and rapid clinical response.

"We've designed the clinic to improve the experience of study participants, while scaling our capacity and maintaining our high-quality standards," said Dr. Ute Berger, ICON's Chief Medical Officer and President, Development Solutions. "By fully integrating our clinical, laboratory, and pharmacy operations under one roof, we can largely eliminate logistical delays. This translates directly into faster dosing, real-time adaptability, and accelerated delivery of high-quality data for our sponsors. We are proud to invest in the San Antonio life sciences community and to contribute to its continued growth as a hub for innovation."

In addition to the San Antonio clinic, ICON's two new satellite outpatient facilities in Houston, Texas, and Lawrence, Kansas will further expand recruitment reach for its existing CRUs in the region. They will also provide greater flexibility for studies requiring extended Phase I follow-up, bringing care closer to participants and reducing travel burden.

The new San Antonio clinic joins ICON's global network of dedicated Phase I clinical research units in Salt Lake City, Utah; Lenexa, Kansas; Groningen, Netherlands; and Budapest, Hungary, reflecting ongoing investment in providing market-leading services for early phase development and research.

About ICON plc

ICON plc is a world-leading clinical research organisation. Offering deep operational and medical expertise we accelerate innovation, driving emerging therapies forward to improve patient outcomes. From molecule to medicine, we deliver integrated consulting, clinical development, commercialisation and post-marketing solutions to pharmaceutical, biotechnology, medical device, government and public health organisations worldwide.
