## ICON's Acquisition of Symphony Clinical Research

### *Acquisition enhances ICON's ability to offer customers hybrid trial solutions and site support services*

DUBLIN--(BUSINESS WIRE)--October 23, 2019--**ICON plc, (NASDAQ: ICLR)** a global provider of drug and device development and commercialisation services to pharmaceutical, biotechnology, medical device industries, today announced that it has acquired Symphony Clinical Research, a leading provider of at-home patient and site support services.

The acquisition, concluded in late September, further enhances ICON's patient, site and data strategy and complements ICON's existing PMG Research and MeDiNova Research site networks in the US and EMEA. Symphony's services reduce the travel burden for patients which broadens ICON's recruitable population, providing patients access to clinical research studies that they may not have otherwise been able to participate in.

Headquartered in Vernon Hills, Illinois, U.S. and Gdansk, Poland, Symphony Clinical Research has been operating since 2003 and has serviced global trials in over 50 countries for biopharma companies across many major therapeutic areas, including cardiovascular, immunology, oncology and respiratory.

Nicki Norris, Chief Executive Officer, Symphony Clinical Research, said: *"As the pioneer in alternate-site services, Symphony integrates clinical trial expertise with project management; in-home care and nursing to bring the site visit to the patient wherever they live. ICON provides Symphony with a great opportunity to extend our services globally and to use our knowledge, infrastructures and network to support ICON to enhance patient recruitment, engagement and retention"*.

Dr. Steve Cutler, Chief Executive Officer, ICON plc, said: *"ICON has a focused patient, site and data strategy which is helping us to improve site identification, study placement, patient recruitment and retention. A core objective of our patient centered approach is to increase predictability in patient recruitment and improve patient engagement. Symphony Clinical Research further enhances this approach by providing us with the capability to offer patients at-home trial services making clinical trials more accessible for patients and improving enrollment. Symphony's clinical trial experience and their strong therapeutic expertise will also enable us to broaden our hybrid trial solutions to customers and support services to sites."*

### **About Symphony Clinical Research**

Symphony Clinical Research is the leading global provider of specialized in-home and alternate-site clinical services. Since 2003, Symphony has been making it convenient to participate in clinical research by bringing study visits to patients, from neonates to geriatrics, in all phases and therapeutic areas of clinical trials.

---

Symphony has spearheaded the patient-centric in-home study services movement and has continually been at the forefront of innovation in clinical research including decentralized, hybrid, direct-to-patient and virtual trials. We continually strive to perfect the service model through developing more efficient and reliable ways to deliver high-quality results.

Symphony's services have significantly accelerated the pace of clinical trials by dramatically improving patient recruitment, retention, compliance and site productivity as well as increasing patient and investigator satisfaction.
